ABOUT ME

Hello there! I'm Sourav Bapari, a seasoned Web, Android and iOS developer with over 3 years of hands-on experience. I thrive on crafting captivating user experiences through sleek UI designs and seamless backend API integration. Presently, I'm fully immersed in the realm of freelancing, but I'm now eager to pivot towards a dynamic role within an organization. My goal? To join forces with a forward-thinking team, where I can not only contribute my expertise but also embark on a journey of collective growth and innovation.

MY LATEST PROJETS

Freelance

The Foto Company - Event Booking app

I've developed an application for a company that offers event photography and videography services. Users can use the app to create bookings for their events, such as weddings, birthdays, and more. They can access all their event images through the application, where they can download them or select specific images to request a physical photo album.

Freelance - Bonwic Technologies

World of Watches - E Commerce

I've crafted an e-commerce application using Next.js, tailored specifically for selling watches. This comprehensive platform includes an intuitive user interface, coupled with an efficient admin panel for easy management. Additionally, it supports multiple payment gateways, ensuring flexibility and convenience for both buyers and sellers.

Freelance - Ideal e Designs

Babagcabs - Cab Booking App/website

I've developed an online cab booking platform using React.js for the website version and Flutter for the mobile application. The backend is powered by Node.js, with MongoDB handling the database operations. The system is seamlessly integrated with the PhonePe payment gateway, ensuring secure transactions for users.

Freelance- Bonwic Technologies

Medx Pharmacy - E Commerce

I've created Medx Pharmacy using Next.js 14 for the store front-end, Angular for the admin panel, Flutter for the mobile application, and Firebase for the backend. In addition, the payment system is integrated with Stripe, ensuring secure transactions for all users. This comprehensive setup ensures a seamless experience for both customers and administrators, with robust functionality and secure payment processing.
